## Lani Hay, president and CEO, Lanmark Technology:

Headquartered in Fairfax, Va., LMT is an SBA 8(a) certified, woman-owned, service-disabled veteran-owned, small, disadvantaged business providing a full range of information technology services, program management oversight, and administrative/management support to clients in the federal government and commercial sectors. With over a decade of experience in the areas of military intelligence and business management, Hay has grown LMT from a one-woman consulting firm to a highly regarded, employee oriented, multi-million dollar technology business enterprise providing services and systems strengthening the federal government.

Prior to forming LMT, Ms. Hay honorably served the United States as a naval intelligence officer. As an air intelligence officer for a patrol reconnaissance squadron in Kaneohe, Hawaii, she analyzed, assembled and disseminated intelligence information for squadron aircrews and carrier air groups by providing operational assessments and briefings on time critical subjects.
